

# Marketing Campaign Analysis – Business Insights Report (EDA)

Prepared by: Kavana PN

## Objective

This report summarizes the exploratory data analysis (EDA) performed on a marketing campaign dataset to understand customer demographics, purchasing behavior, and campaign performance. The goal is to identify actionable business insights and recommend marketing channels that can improve return on investment (ROI).

## Dataset Overview

- Total Records: 2,240
  - Total Features: 29
  - Missing Values: 24 (Income column)
  - Duplicate Records: 0
- The dataset was cleaned before visualization and analysis.

## Key Findings

- Most customers belong to the Graduation education category.
- Married and Together customers form the largest customer groups.
- Most customers are between 45–65 years of age.
- Income is concentrated below 100,000 with a few high-income outliers.
- Wine products received the highest customer spending, followed by meat products.

## Business Insights & Recommendations

### Marketing Performance

Campaigns 3, 4, and 5 achieved higher customer acceptance than Campaign 2. Catalog purchases were the most popular purchase channel, followed by web purchases.

### Recommendations

1. Allocate a larger marketing budget to Catalog and Web channels.
2. Target high-income customers using personalized campaigns.
3. Promote wine and meat products through loyalty offers and seasonal discounts.
4. Reassess low-performing campaigns and improve audience segmentation.
5. Continue monitoring customer behavior using EDA for future marketing decisions.

## Conclusion

The exploratory data analysis provides valuable insights into customer preferences and campaign effectiveness. These findings can help organizations optimize marketing strategies, improve customer engagement, and maximize ROI through data-driven decision-making.
